

Project Cosimo

Finextra NextGen Banking Nordics
Stockholm, 16th of November 2017

What is Project Cosimo?

What we do

- Boring AI
- Automation of back-office administration
- Profitable, scalable, low implementation overhead
- First Product: Transaction matching
- First Market: Banks

What we believe in

- AI automation will revolutionize all processes across all industries
- A focus on AI will leapfrog the traditional steps of digitalization

Automation vs. Analytics

- Automation is more transformative than enhanced analytics

Internal vs. Customer Facing

- Robots for internal processes and humans to take care of customers

Forget the Data

- AlphaGo Zero insights from the AI lab
- Reinforcement learning with zero data beats data trained system: 100-0
- Focus on the use case and fast roll-out

Thank You!
